THE WORLD OVER

REFUNDING LOAN SUCCESSFUL
GERMANY QUITS THE LEAGUE

OTTAWA—The 1923 Refunding loan went over the top on Friday night with the \$125,000,000 total definitely assured. The books of the loan closed at 12 o'clock Saturday noon with a substantial over-subscription.

Commenting on the result of the loan, Mr. Rhodes said: "The complete success of the refunding loan within a period of five days and with funds supplied entirely by Canadian investors is a most convincing demonstration of Canada's financial strength and supplies further evidence of the country's economic recovery."

Commenting on the loan on his arrival in Calgary on Friday, Premier Bennett said: "It was a success before it started, but nevertheless I have been very gratified by the results of the campaign. Really I don't know anything more I can say about it. Remarks of that nature are somewhat hackneyed. I think, but the result of this refunding campaign has been further evidence of the confidence everywhere in Canada's future and it has made a determination to assist with the solution of Canada's problems. I appreciate this confidence and purpose most sincerely."

BREITLIN—Chancellor Adolf Hitler has announced to the world that Germany had definitely resigned from the League of Nations and withdrawn from the international disarmament conference, that she had done so because she refused to be a nation of "second-class rights" and wants "equality and honor." Germany's dictator declared himself as determined to follow a course of militant nationalism in international affairs which minutely parallels his militant nationalism at home. He told the world in his momentous address that the German Government and people are "animated by no other wish than to help end the human epoch of tragic error, regrettable quarrel and fight." He assailed the post-war Versailles Treaty and maintained there is "no possibility of territorial conflicts between France and Germany."

CARBON, ALBERTA, THURSDAY, OCTOBER 19, 1933

CLUB HAS BEEN ORGANIZED BY LOCAL CITIZENS

A number of local people interested in the forming of a literary and dramatic club gathered together in the Carbon school on Friday night to discuss the prospects for such a club. The first part of the evening was devoted to talking. Following this short address was given by Mr. McCreedy and Rev. McNichol, following suggestions as to what it would be desirable for a club of this kind to undertake. It was finally decided by those present to form a club interested in literary work, current events, debating and dramatics.

Officers were elected as follows: President, Hugh J. MacDonnell; Vice-President, Mrs. McQuade; Secretary, Jack McCreedy; Treasurer, Wilfred Paxon; Executive, Miss Halcord, Mr. McCreedy and Mr. McNichol.

The ladies served lunch at the close of the meeting. The planning of the first program of the club was left to the executive and the place and time of meeting will be announced later.

Anyone interested in the work of the dramatic club is cordially invited to attend these meetings. The time so spent will be well worth the effort and should be both educational and entertaining.

Beware of Beggars

The citizens of Carbon who have a soft spot in their hearts for those tramps and others who appear down on their luck may not know it, but nine cases out of ten they are being played for suckers when they "divvy up" dimes and nickles to help "get a hungry man a bite to eat." Many times in the past we have come across transients and bums who were suffering from intoxication due to imbibing of mixtures ranging all the way from wine chilled in the paraffin of the road hop iron, to canned heat, rubbing alcohol, brasso, shoe polish, lemon extract, or in fact any commercial concoction that contains sufficient alcohol to give one's system a funny feeling.

Many of the lower classes of humanity have been the cause for the fresh air and open streets of the country towns where they find the

SKATING RINK BEING LENGTHENED

"Shorty" has been busy the past week on the skating rink and with the financial assistance of the hockey lads the rink is to be lengthened to practically regulation size. Funds are now being raised to complete this work and put in a permanent lighting arrangement. When these improvements have been completed Carbon's rink will compare favorably with those of other towns.

CHICKEN SUPPER ON OCT. 21

The W. A. of the Anglican Church is putting on a chicken supper in the Farmers' Exchange hall, Carbon, on Saturday, October 21st, commencing at 6 p.m.

Following the supper a musical program has been arranged and the evening's refreshment and program of entertainment is being provided for the small sum of 50c for adults and 25c for children.

Elevator Week in Carbon

This week can be termed as elevator week in Carbon, for all the local elevators are carrying advertising in this issue of The Chronicle.

Last year the elevators in the Carbon district had a long handling. This year they cannot expect more than half the number of bunshees that were handled in 1932. At the same time, if our farmers realized that they could deal better with the local elevator over a period of years than they could with truck buyers, considerable more grain would pass through the local grain houses, and more cash through the farmers' pockets.

THE PROBLEM OF YOUTH

From the earliest times it appears that the problem of directing young folks in the proper way have engaged the serious attention of reformers and philosophers—and busybodies.

A book on education published in 1859 gravely warning young women of the perils of the waltz and declared that "unmarried ladies should refrain from the waltz altogether, in public and private." It is assumed that married ladies were supposed to be immune to its demoralizing effects.

Twenty years in a while someone has up an old newspaper or magazine containing an article which throws light on the tendency to worry about the young people of the past. The boys and girls of the present generation are likewise causing consternation among the well-appointed guardians of morality.

But the youngsters of today, in spite of their seeming frivolity, are the earnest, clearest and most promising crop of future citizens the world has ever seen.

SUCCESSFUL SEASON FOR DINOSAUR HUNTERS

A successful season has attended dinosaur hunters along the banks of the Red Deer River this summer, and one almost complete skeleton of a flesh-eating dinosaur was unearthed by Professor L. Sternberg, of the Toronto museum, and his party. The find was considered of great importance, the head especially being in good condition and almost complete. Among other finds were a skull of a coeloc dinosaur and the skull of a horned dinosaur, and two other specimens of trachosaurs.

people either more sympathetic or not in the know when it comes to staling up underworld characters. These unprincipled tramps are making it most embarrassing for the fellow who is down-and-out and trying to go straight. In the search of a job, for when a person finds that his hard earned cash is used for illicit and unnatural forms of vice he is not so ready to hand it out to a stranger.

Yes, it is better to give a starving man a sandwich in these days when certain members of the so-called human race are so deceitful.

EXPRESS RATES REDUCED

Reduced rates on express parcels weighing from one to four pounds became effective on October 2, with the operation of new tariffs affecting all railway express companies in Canada. Under the new tariff the charges for

L. POXON HEADS CURLING CLUB FOR THIS YEAR

The annual meeting of the Carbon Curling Club was held in the Municipal office on Friday night last with a fair representation of players present.

The following officers were elected for the coming year.

President, L. Poxon; Vice-President, J. P. Poxon; Sec. Treas. A. P. McKinnin; Chaplain, Rev. Wm. McNichol; Executive Committee, Messrs. Jealous, Rouleau, McNichol, Garrett, McCreedy, McCreedy, Messrs. Paxon, McNichol, and Sandy Reid.

Much important business was discussed and plans were laid for the season's sport and the necessary preparation of the rink before ice machine could be commenced. It was decided to purchase saw dust this year from the owners who have considerable of this substance now stored in the rink building. The pump house is to be repaired and main water for the winter's work and pipes from the building to the curling rink will be placed here.

This work is now being carried out and everything should be ready for ice making as soon as freeze-up.

Proposals are said to be favorable for a good membership this year and many new curlers are expected to get into the game.

WHY ARE SENATE VACANCIES LEFT UNFILLED?

The Free Press says the remarkable fact that there are twelve vacant seats in the Senate waiting to be filled is commented upon by an eastern contemporary which remarks that, in times past, there have been many aspirants for appointment to the Senate and that vacancies were filled more promptly.

Are there not now a dozen men and women ambitious to sit in the second chamber of Parliament? It is true. Are there not those who will be willing to sacrifice peace and privacy for the common good of aspiring nation? Have we no stout hearted patriots eager thus to serve their country?

Raising the question of why the vacancies are not filled, the newspaper suggests that the Senate act, not alone, but that the treasury is saving the \$4,000 indemnities of 12 senators, or \$48,000 a year.

But the eastern journal could discuss more interestingly on the afore said vacancies if it told its readers all it knew. For instance, it knows that an appointment to the Senate recently means the resignation of a member of the House of Commons. According to the usual practice more than half the twelve vacancies would be filled by present members in the House. Their resignations from that House would call for by-elections, and that is the whole secret.

The Government does not want by-elections. It does not want anything that will reveal its loss of support in the country. If it were confident of retaining that support, the appointments would have been made before this. But the Government thinks it safer to delay the appointments until the approach of the general election when it will be too late for any by-elections.

WHY SHE'S A SHE

The question of why a locomotive is called a "she" has been referred to one of the railroaders. He says:

"There are many reasons for this. For instance, she wears a jacket with a yoke, pins and shields. She has an arched and a lap, too. Not only does she have shoes, but she sports pumps and even hose while she drags trains behind her. She also attracts attention with puffs and mufflers and sometimes she fumes and refuses to work. She needs guiding and she requires a man to feed her, but must characterize of all is that she is much sturdier when she is hooked up."

one to four pound package between points in Canada is considerably more reduced with the charges varying according to the weight of package and distance over which it must be carried. The charges include pick-up and delivery service at all points where these facilities are maintained.

WANT SHIPPED RATE ON CATTLE

FIXED INCLUSIVE RATE FOR ALBERTA CATTLE SHIPPED TO OLD COUNTRY

EDMONTON—Fixed inclusive rate for Alberta cattle, shipped from Alberta points to point of debarkation in Great Britain, is being sought from the Dominion government by Alberta livestock breeders, and in pressing their requests the breeders, headed by Hon. George Hawley, Minister of Agriculture and Health, will interview Premier R.B. Bennett during his western stay.

At present, in addition to the rate for transportation, there are extra fees for feed, for water, for attendance and other matters which when totalled give an entirely different picture of rate costs than the official rate quoted. The stock breeders are anxious to obtain an inclusive rate, so that shippers will know exactly what it will cost per head to ship to the British market.

Last Meeting of Carbon M. D.

At the last meeting of the Municipal District of Carbon held in town the following councillors were present: Messrs. Wright, Webster, Marsman, McCreedy, and Crowell.

Much routine business was dispatched and the council applied for a license to erect the Kase Hill creek on the south west of section 15-29-21, which is near the Oliphant mine, to the Department of Public Works.

Messrs. E.H. Wright and J. McCreedy were appointed delegates to attend the Municipal Districts Convention to be held in Edmonton on November 22, 23 and 24.

Final correspondence was read from the Minister of Public Works. Hon. O. M. Peterson, regarding the granting the Carbon-Rockford road and this matter will not be undertaken at the present time.

IS BEAST ATTACKING BINNED AGAIN

The Lethbridge Herald makes note of a new menace that is attacking stored grain in bins. It is a tiny organism, and reports of outbreaks have come from Chesham and other parts of the province.

One of the Chesham elevators is running twenty-five thousand bushels of affected grain through the cleaner in an effort to eradicate the pest. The only grain affected is that in storage from previous years.

The Dominion Entomological branch informed the Herald last Monday that they had been warned last spring to be on the alert for a mite that attacks threshed grain, but no occurrences had been reported. The Ellison Milling Company stated that there had been an evidence of the plague at their elevators, but officials admitted they had heard of it in sections of the north-Western Advocate.

GARLAND WILL SPEAK HERE ON TUES. OCT. 24TH

E. J. Garland, M.P., and J. W. Whetley, are scheduled to speak in Carbon on Tuesday evening, October 24th, at 8 p.m., in the Farmers' Exchange hall. Mr. Garland is on a tour of the Bow River Constituency, which he represents, and hopes to have a large gathering of the convention and its members.

A meeting will be held at 8 o'clock on Monday night, October 23rd, at 8 p.m. These meetings are open to the general public and everyone is cordially invited to attend.

Bow River Constituency Convention

The Bow River Constituency convention will be held in Carbon, Friday, October 28th, at 8 p.m., for the purpose of the convention will be to elect officers and outline the program of work for the coming months.

The Bow River Constituency Convention has now been definitely set according to information given to this newspaper. For local residents these boundaries may be interesting, limited by taking the north boundary, which is set at the townsite boundary, and west to the townsite boundary.

In school always took the prize. He used to lick boys twice his size. I bet folks all had bulging eyes.

"WHEN PA WAS A BOY"

I wish I'd been here when my paw was a boy. There must have been excitement then. When my paw was a boy, Harry's shoe must have lost the prize.

When my paw was a boy, How grandpa must have loved his son. When my paw was a boy, He'd get the coal and chop the wood.

When my paw was a boy, He'd think up everything he could. To always be just sweet and good.

When my paw was a boy, When my paw was a boy, He never, never disabled.

He best in every game he played, Gee! what a record there was made.

When my paw was a boy, I wish I'd been here, I do. When my paw was a boy, They'll never be his like again.

When my paw was a boy, But still last night I heard my paw. Raise up her voice and call my paw.

The sweetest foot that she ever saw, He ought of stayed a boy.

Bird Banding in Canada Provides Valuable Information In Tracing Movements Of Wild Life

The economic importance of wild birds and their relation to man's welfare is being more widely recognized, and by bird banding the store of knowledge of their movements and habits is gradually being extended. In order to take proper steps toward conservation, by the enactment of good game laws, properly located bird sanctuaries, and other means, it is essential that as much exact scientific information as possible be available concerning all species of native wild birds.

Scientific bird banding as a means of studying and solving the many and varied problems relating to the migration, range, breeding grounds, and general life histories of wild birds is conducted in full co-operation between the National Parks Service of the Department of the Interior, Canada, and the United States Bureau of Biological Survey at Washington, D.C. Most of the banding work is done by voluntary co-operators throughout Canada and the United States.

The general public is urged to aid in this work by watching for birds on the legs of any birds that may come into their possession and to report the finding of such birds to the Commissioner, National Parks Service, giving the number on the band, the date on which the bird was taken, as well as the locality, and whether the bird was killed, found dead, or captured alive.

All official bands are of aluminum or copper and are inscribed with a serial number and with a letter designating the bander. It is estimated that each year, many bird bands are recovered, but for various reasons not reported to the Commissioner, official bird bands recovered from wild birds have been found hanging on nails, together with other necessities used as toys by children, and in many curious places in wilderness and civilized surroundings.

Bird banding may be carried on only under Dominion permit and only official bands may be placed on wild birds. Full information as to the manner in which bird banding is being conducted will be gladly furnished to persons who are interested, upon application to the Commissioner, National Parks Service, Department of the Interior, Ottawa.

Radio Stations Guide Ships

Thousands Of Direction Calls Are Answered Every Year

An instance of the work done by Canadian government wireless stations in guiding North Atlantic shipping is provided by the Chouinard Head direction-finding station at the entrance to Halifax harbor. A yearly average of 4,000 to 5,000 calls from ships of the coast are answered by this station. Since its establishment in 1917 the number of wrecks along this section of the coast has greatly decreased.

Located nine miles from Halifax, the Chouinard Head station is operated by the Department of Marine for the purpose of giving bearings to ships and handling commercial messages. A staff of five maintains 24-hour service.

Other stations are located at Sable Island, St. Paul, Capa, Yarmouth, Red Head, N.B., Cape Race, Nfld., and Father Point, Que. Operators are transferred at one or two year intervals.

Canada's Maple Trees

Not Only Ornamental But Have Great Monetary Value

The maple tree, the leaf of which is the national emblem of Canada, is not only a notably fine ornamental tree, but also has a unique monetary value apart from its value as lumber. The production of maple syrup and maple sugar in Canada this year was 1,923,315 gallons of syrup valued at \$1,520,626, and 5,785,130 pounds of sugar with a value of \$469,712, the combined value being \$2,029,341. Most of the maple syrup and maple sugar produced in Canada comes from the Province of Quebec, with Ontario in second place. Small quantities are produced in Nova Scotia and New Brunswick. These products are derived from millions of maple trees which are tapped in the month of March each year.

Wines, liquors and cigars sold after dark in Hamilton, Ontario, are now subject to a special tax for the benefit of the unemployed.

Front line drenched men by enemy's Argentine tanks.

Cannot Have Been Mistaken

Many Sailors Have Seen Sea Serpents

In Persian Gulf
A sea serpent appears in the Persian Gulf. Millions of landmen who have never been anywhere near the Persian Gulf say that nothing of the sort happened at all. Yet for 200 years these monsters have been sighted in the less frequented seas. It is difficult to believe that right generations of travelers and seamen have been fooled. The first fully documented account of a sea serpent was furnished by Han Yigede, a Norwegian missionary to Bergen, in 1740; the latest by two officers of H.M. surveying ship "Reliance" in the "Thames" estuary in 1923.—London Daily Express.

No Cause For Pessimism

Conditions Bound To Improve If Canadians Retain Confidence

There is a present danger that there may be new wave of pessimism sweep over the people, and especially in the West, because conditions in the mining community have not improved up to expectations. There is absolutely no cause for any such sentiment. In one word, the situation in the Dominion is self-sufficient, and that is by the promotion of confidence, which is a species of "nationalism" in which there is nothing but good.—Regina Star.

Winnipeg Newspaper Union

Two famous civil marriage registers in London, England, some of many a wedding of peer and stage star, him notable, costumer or ex-convict, have themselves contracted a union. The old, gloomy office in Prince's Row, Westminster, and the equally dilapidated office in Henrietta Street, Covent Garden, have been succeeded by a brand-new building at Carlton Hall, Westminster.

The old-painted hall in the new building leads to no fewer than seven rooms where the knot can be tied with efficiency and dispatch in the presence of anywhere from half a dozen to a half a hundred spectators. Should a reception follow, every convenience is afforded for a great, equaling a west end hotel dinner or merely bottled beer and sandwiches.

An Anglican clergyman is partly responsible for this move for civil marriage. Rev. E. Schomburgk, vicar of St. Andrew's Ashby Place, as Mayor of Westminster, presides over the Westminster City Church, which inaugurated the change.

"People who get married in church just to have an imposing background, and who care little for the beauty and solemnity of the actual service, can get all the pomp and circumstance they want here," he says. "He shall not mind forgetting a lot of fees if he now office takes some of these people off his hands."

Rayon Mills of Mexico are operating three shifts a day.

CHARMING! ISN'T IT? YOUTHFUL TOO! IT WILL MAKE YOU APPEAR YOUNG AND SLENDER

Here's the new jumper dress you'll want to include in your fall wardrobe. So young and flattering with a jaunty altogether attractive carried out in bright, iridescent green. The jumper is white, long-sleeved, with a shirtdress band from the waist to the hem.

Choose this pattern! Make the French model at just the cost of material.

Oxford grey checked tweed is another smart scheme with valanced orange wool crepe jumper.

Style No. 246 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Western Provinces Account For More Than Half Of Acreage In Canada Devoted To Oats

The cultivation of oats is of more recent date than that of wheat and barley. While the origin of the cultivation of wheat can be traced in all probability to a warm climate, and that of rye to a cold climate, oats were found occupying an intermediate position. It is not possible to find any record of their use by the ancient peoples of Egypt, Palestine, Greece, Rome, India or China. Probably oats were cultivated at an early date by people who inhabited east-central Europe, and some historians point more definitely to Tartary in Western Asia as the probable place of their first cultivation. Oats were less important than wheat, barley or rye in the early development of southern Europe, but came into much greater use with the civilization and expansion of the central and northern (temperate) portions of the continent. The crop, being particularly suited to the cool, moist climate, became a leading cereal.

Having many uses besides that of food for man, the oat crop has continually expanded in a natural sequence of crop cultivation. At first only such crops were grown as would serve for human food and natural means provided sufficient forage for domestic animals. With increasing population more and more ground was given over to food for livestock, and thus the use of fodder crops, like oats, has become an increasingly important part of husbandry, especially in temperate regions.

On the basis of acreage and tonnage produced, oats rank second only to wheat. In 1932 the acreage of wheat in North America was \$24,000,000 acres and yielded 1,161,000,000 bushels, while in Europe, excluding Russia, 85,000,000 acres produced 1,485,000,000 bushels. Oats sown in Europe on 51,300,000 acres yielded 1,658,000,000 bushels and in North America from 42,200,000 acres 1,828,000,000 bushels were produced. This made 2,648,000,000 bushels of what from 168,200,000 acres and 3,486,000 bushels of oats from 96,300,000 acres in Canada, yielding thirty-four pounds to the bushel and wheat sixty pounds. The United States bushel of oats is thirty-two pounds.

While the area sown to oats is considerably less than the area sown to wheat in North America and Europe, production of oats, in bushels, exceeds that of wheat by about 800,000,000 bushels due to higher yields per acre. On a tonnage basis, of course, the production of wheat exceeds that of oats by a considerable margin.

Oats are produced over a wide area, but heaviest production is found in the middle western areas of the United States, Canada, the United Kingdom, Germany, France and Russia. These six countries produce about seventy-five per cent of world production of oats.

The nature of the disposition of the world production of oats is indicated by the fact that although world production amounts to about 4,500,000,000 bushels, world trade in oats amounts to only about 100,000,000 bushels, or slightly over two per cent of production. Therefore, the great bulk of world production of oats is consumed at or near areas of production.

The chief use of oats is as a feed for livestock. Oats are the standard feed grain for horses and, alone or in combination with other grains, are used as a feed for cattle, sheep, hogs and poultry. In spite of a high percentage three content, oats are relatively high in protein and fat. Oats, when used in protein content, are higher than wheat and barley in fat content.

The area sown to oats in Canada in 1932 amounted to 15,148,000 acres compared with an area of 27,182,100 acres sown to wheat; 3,757,000 acres sown to barley and 771,800 acres sown to rye. In other words, of the total area sown to the four leading cereal crops 29.3 per cent was sown to oats.

According to the estimate of 1932 cereal production, production of oats in Canada amounted to 361,500,000 bushels compared with wheat production of 428,514,000 bushels, barley production of 80,773,000 bushels and rye production of 8,958,000 bushels. Converting the foregoing production figures to a tonnage basis, total production of the four cereals amounted to 21,700,444 tons of which 6,650,500 tons or 30.7 per cent consisted of oats.

Reports to the Dominion Bureau of Statistics show 33.3 per cent of 1932 acreage sown to oats in Canada.

knackwren, 20.6 per cent in Alberta and 11.2 per cent in Manitoba. The prairie provinces accounted for 65.1 per cent of the total Canadian acreage devoted to oats in 1932. Ontario and Quebec had 17.8 and 13.1 per cent, respectively. The balance 4.0 per cent was distributed among the Maritime provinces and British Columbia.

It is noted that there is a tendency toward decreased consumption of oats in Canada in recent years. Many causes have contributed. One of the most important factors in the decline has been the introduction of power machinery in western Canada. In the years 1924 to 1928 or 1929, the tractor displaced the horse to a considerable extent especially in regions where oats are not considered a favorable crop. The tractor not only displaced the horse from the farm, but in many cases relegated the horse to a pasture diet. It is probable that the number of horses raised in Canada has also decreased in recent years due to the mechanization of delivery systems. Further, the use of oats in Canada has, no doubt, been affected by the increase of feeding of barley to livestock in efforts to promote the use of horses raised in Canada. During the past seven years the United Kingdom has imported an average of 23.4 million bushels of oats per year. The Canadian share of this trade may be estimated at about 4.5 million bushels, or slightly over 20 per cent, of total imports to the United Kingdom. During the past seven years, Canadian exports of oats have averaged 11.1 million bushels per year. Consequently it would appear that the United Kingdom has absorbed about 10 per cent of total Canadian exports of oats during the seven years.

Annual Loss Is Heavy

Destruction By Rabbits In Australia Equals National Debt

Pointing out that Australia is now conducting its annual campaign to exterminate rabbits, Vice-Consul H. H. Hunt calls attention to the havoc wrought by the Commonwealth by this prolific pest.

It is estimated, he points out, that the destruction caused by the rabbit amounts to between 20 and 40 million pounds sterling annually, a sum about the size of the country's national debt.

Not only is the loss computed on the damage done to crops, but on the reduced carrying capacity of the land, the loss of stock in drought years caused by the rabbits eating out the native herbage and bush which normally would serve as a source of stock and the loss of water in dams and other conserves through banks weakened by the rabbits.

So destructive have rabbits been in parts of Central Australia, that they have destroyed the native herbage, causing large areas to become windward wastes.

A fairly substantial export trade in rabbit carcasses has been developed, the report shows. During the fiscal years 1931-32 exports from the Commonwealth amounted to 7,892,000 pairs, valued at \$2,230,000 and 7,862,000 pounds of skins worth \$2,378,000.

Rabbits and hares were introduced into Australia from England in 1859. By the end of the nineties they had invaded every section of the Commonwealth.

The Weekly Newspaper

Is Taken Home And Read By The Whole Family

An Alberta weekly newspaper is the only one in its province to give its office for their mail they litter those offices with a lot of mail material, but never with the newspapers they receive. It notes that circulars and such matter are constantly and the sheets carried by the florist, but that newspapers are accorded infinitely greater respect. They may be consigned to kindred fate later, but never until after they are taken home and read by the whole family, including hired man.

This is true as it is also readily explainable. The newspaper carries much of interest and value. It mirrors the great world outside. It is not only a welcome visitor, but a visible institution in the home. Furthermore, its cost is relatively trivial.—Regina Leader-Post.

A plea is being made in Bolivia for a reduction in radio license fees for the unemployed.

Harvests in Mexico this year have been largely lost to expected.

Mr. and Mrs. R. Greenhalgh have returned home after spending a couple of weeks at Vancouver and other places.

It has been announced that the next meeting of the club recently formed to sponsor dramatic, literary and other work, will be held on November 8th. The program will consist of a debate and musical numbers.

Mr. E.G. Mathies of Trochu, who was to have visited Carbon in the capacity of radiologist, was unable to keep his appointment last week, but has announced that he will be here around the 18th of this month.

Don't forget the junior hockey club dance on Friday night, and the chicken supper on Saturday night, of this week. Both these entertainments will be held in the Farmers' Exchange hall.
